Wat men moet leren doen, leert men door het te doen

(Aristoteles)

Het eerste jaar in onze nieuwbouw was heftisch. We zijn voortvarend van start gegaan. Wat we vooraf bedacht hadden, komt in de praktijk uit. De ruimtes zijn veel lichter, de werksfeer is prettiger en de routing zit logischer in elkaar. Ik ben hartstikke trots hoe iedereen zijn schouders eronder heeft gezet.

Het is ook wennen. Niet alleen voor onszelf, maar ook voor de jonge planten. Sommige soorten groeien anders of sneller. We krijgen er steeds meer gevoel bij hoe we daarop kunnen anticiperen. Elke dag leren we iets nieuws. Het is leuk om met elkaar zulke dingen te ontdekken en oplossingen te vinden. We leren door het te doen.

Voor het nieuwe seizoen hebben we een flink aantal producten aan ons assortiment toegevoegd, waaronder een serie grassen. Bovendien is de Heuchera Indian Summer serie uitgebreid met nieuwe kleuren.

Ons complete assortiment vindt u in de nieuwe AllPlant Young Plants catalogus 2018. Voor dit nieuwe seizoen kijken we uit naar weer een plezierige samenwerking met u.

EN | The things we have to learn before we can do them, we learn by doing them. (Aristoteles)

The first year in our new-build premises was hectic. We made an energetic start. We achieved what we thought we would. The growing spaces are much lighter, the working atmosphere is more pleasant and the routing is more logical. I'm extremely proud of how everyone put their back into it.

It's also a question of getting used to the new situation. Not just for ourselves, but also for the young plants. Some varieties are growing differently or more rapidly. We're getting more and more of a sense of how we might anticipate this. We're learning something new each day. It's fun to discover such things and find solutions together. We're learning by doing.

For the new season we've added a large number of products to our range, including a series of grasses. Furthermore, the Heuchera Indian Summer series has been expanded with new colours.

Our full range can be found in the new AllPlant Young Plants catalogue 2018. We look forward to continuing our enjoyable partnership with you during this new season.

Simon Gootjes
Director

DU | Was man lernen muss, um es zu tun, das lernt man, indem man es tut. (Aristoteles)

Das erste Jahr in unserem Neubau war hektisch. Wir haben uns tatkräftig an die Arbeit gemacht. Was wir im Voraus geplant hatten, konnten wir umsetzen. Die Räume sind viel heller, die Arbeitsatmosphäre ist angenehmer und die Wegführung ist logischer aufgebaut. Ich bin sehr stolz darauf, wie tatkräftig alle mitgewirkt haben.

Jetzt müssen wir uns an alles gewöhnen. Aber nicht nur wir selber, sondern auch die jungen Pflanzen. Einige Arten wachsen anders oder schneller. Wir bekommen immer mehr Gefühl dafür, wie wir uns darauf einstellen können. Wir lernen jeden Tag etwas Neues. Es ist toll, derartige Dinge gemeinsam zu entdecken und Lösungen zu finden. Wir lernen durch das Tun.

Für die neue Saison haben wir unser Sortiment um etliche Produkte erweitert, darunter auch eine Reihe von Gräsern. Außerdem wurde die „Heuchera Indian Summer“-Produktreihe mit neuen Farben erweitert.

Unser komplettes Sortiment finden Sie im neuen AllPlant Young Plants-Katalog 2018. Für diese neue Saison freuen wir uns wieder auf eine angenehme Zusammenarbeit mit Ihnen.

Simon Gootjes
Geschäftsführer

Betrouwbaar & Innovatief

AllPlant is gespecialiseerd in de opkweek en verkoop van jonge planten uit weefselkweek, bestemd voor professionele kwekers. Wij proberen de beste planten voor tuin, terras of openbaar groen aan te bieden.

U vindt bij ons een innovatief assortiment van meer dan 450 veelal vaste planten, waaronder de winterharde Geranium, Anemoon, Heuchera en Echinacea.

We groeien steeds verder

Begonnen in 1997 op kleine schaal met enkele soorten, zijn we uitgegroeid tot een belangrijke leverancier, van nieuwe planten voor professionele kwekers. We ontwikkelen en groeien voortdurend mee met onze planten en onze klanten. Wij proberen hierin voorop te lopen door het assortiment, nieuwe ontwikkelingen en technieken.

We werken nauw samen met veel veredelaars en ook onze klantenkring groeit steeds verder dankzij de nieuwe, interessante producten die we elk jaar mogen voeren. Ruim 90 procent van ons aanbod is kwekersrechterlijk beschermd.

Prijswinnaars exclusief bij ons verkrijgbaar

In onze catalogus vindt u meerdere prijswinnende planten. Veel soorten zijn selectief of exclusief bij ons verkrijgbaar. Een voorbeeld daarvan is de Geum 'Scarlet Tempest', die in 2016 de tweede prijs heeft gewonnen op de RHS Chelsea Flower Show, in de categorie 'Plant van het Jaar'. Afgelopen seizoen is deze plant succesvol geïntroduceerd.

**‘Veel soorten
zijn exclusief
bij ons
verkrijgbaar’**

Daarnaast gaan we nog verder inzetten op de kleurrijke Echinacea Sunseeker Series en de nieuwe Heuchera's in de Indian Summer Series. Naast de Anemone Wild Swan die 6 jaar geleden de eerste prijs won op de RHS Chelsea Flower Show, komen meerdere soorten uit de Swan Serie beschikbaar. En wat te denken van de Geranium Rozanne: in 2013 door de Royal Horticultural Society uitgeroepen tot 'beste plant van de afgelopen honderd jaar'. Al deze prijswinnaars zijn bij ons beschikbaar. Samen met een breed aanbod van bekende en mindere bekende soorten, die ook uw bedrijf kunnen laten groeien.

Op al onze aanbiedingen en leveringen zijn onze Algemene Leveringsvoorwaarden van toepassing. Deze kunt u downloaden op www.AllPlant.nl <

EN | Reliable and innovative

AllPlant specialises in growing, rooting and sale of young plants from tissue culture, intended for professional growers. We offer the best quality outdoor plants for gardens, patios or public spaces. You can choose from our innovative range of more than 450 plants, most of which are perennials, including the winter-hardy Geranium, Anemone, Heuchera and Echinacea.

We continue to grow

Having started on a small scale in 1997 with just a few species, we have now developed into one of the leading suppliers of new plants for professional growers. AllPlant is constantly developing and growing along with our plants and our customers. We work closely with many breeders and continue to grow thanks to the new and interesting products added to our range each year. More than 90 percent of our range of plants is protected by breeder's rights.

Prize winners exclusively available

Our catalogue features a variety of award-winning plants. Many species are selectively or exclusively available via AllPlant. One of these is the Geum 'Scarlet Tempest', which earned second place in the 'Plant of the Year' category at the RHS Chelsea Flower Show in 2016. This plant was successfully introduced last season. In addition, we plan to focus more on the colourful Echinacea Sunseekers Series and the new Heucheras in the Indian Summer Series. In addition to the Anemone Wild Swan that won first prize at the RHS Chelsea Flower Show five years ago, several varieties from the Swan Series are being made available. And what about the Geranium Rozanne, which was voted 'Best Plant of the Centenary' by the Royal Horticultural Society in 2013? All these award-winning plants are now available, together with a wide range of known and less known species that will also help your company to grow.

All our offers and deliveries are subject to our General Terms and Conditions of Delivery. You can download these at www.AllPlant.eu

DU | Zuverlässig und innovativ

AllPlant hat sich auf die Aufzucht und den Verkauf von Jungpflanzen aus Gewebekultur konzentriert, die für professionelle Züchter bestimmt sind. Wir versuchen, die besten Pflanzen für Garten, Terrasse und den Landschaftsbau anzubieten. Sie finden bei uns ein innovatives Sortiment von ungefähr 450, meist winterharten, Sorten, darunter die Geranien, Anemonen, Heuchera und Echinacea.

Wir wachsen immer weiter

Wir haben 1997 mit einigen Sorten angefangen und sind seitdem zu einem wichtigen Lieferanten neuer Pflanzen für professionelle Gärtner herangewachsen. Wir entwickeln uns kontinuierlich weiter und wachsen mit unseren Pflanzen und unseren Kunden. Wir probieren immer einen Schritt voraus zu sein mit unserem Sortiment, neuen Entwicklungen und Techniken. Wir arbeiten eng mit vielen Züchtern zusammen, und auch unser Kundenkreis wächst dank der neuen, interessanten Produkte, die wir jedes Jahr führen dürfen, immer weiter. Rund 90 Prozent unseres Angebots sind zuchtrechtlich geschützt.

Preisgekrönte Pflanzen exklusiv bei uns erhältlich

In unserem Katalog finden Sie verschiedene preisgekrönte Pflanzen. Viele Sorten sind selektiv oder exklusiv bei AllPlant erhältlich. Ein Beispiel dafür ist die Geum Scarlet Tempest, die 2016 den zweiten Preis bei der RHS Chelsea Flower Show in der Kategorie 'Pflanze des Jahres' gewonnen hat. Diese Sorte ist in der letzten Saison erfolgreich auf den Markt eingeführt. Außerdem werden wir uns noch weiter für die farbenfrohe Echinacea Sunseeker Serie und die Heuchera Indian Summer Serie einsetzen. Auch die Anemone 'Wild Swan', die vor sechs Jahren den ersten Preis bei der RHS Chelsea Flower Show gewonnen hat, ist weiter lieferbar, neben neuen Sorten aus der Swan Serie. Und was halten Sie von der Geranie Rozanne, die 2013 von der Royal Horticultural Society zur „Besten Pflanze der vergangenen 100 Jahre“ gewählt wurde? Alle diese ausgezeichneten Pflanzen sind bei AllPlant verfügbar. Außerdem bieten wir ein großes Angebot bekannter und weniger bekannter Arten, die auch Ihr Unternehmen wachsen lassen können.

Alle unsere Angebote und Lieferungen unterliegen unseren Allgemeinen Geschäftsbedingungen. Sie können sich diese auf www.AllPlant.de herunterladen

- Heuchera - INDIAN SUMMER

Innovaties in teelt

AllPlant gelooft in innovatie. We dwingen onszelf voortdurend te verbeteren in de manier waarop we werken, onze duurzame technieken en ons assortiment te vernieuwen.

Vernieuwend assortiment

In samenwerking met veredelaars brengen we elk jaar nieuwe planten op de markt. We streven ernaar steeds de beste en meest interessante planten aan te bieden voor tuin, terras of openbare ruimte. Daarbij zijn een goede kwaliteit en hoge leveringszekerheid steeds het uitgangspunt.

Opkweek in Cosmo-Pluggen

Onze planten worden beworteld in Fibre-Neth pluggen die speciaal volgens onze ideeën en wensen verder zijn ontwikkeld. Deze bestaan voor het grootste deel uit kokos. Dat geeft de minste belasting voor het milieu en de beste groeieresultaten. De pluggen zijn vormvast, waardoor een hoog luchtgehalte is gegarandeerd. Ze zorgen voor een optimale plantontwikkeling

‘Wij dwingen
onszelf
voortdurend
te verbeteren’

en hoge bewortelingssnelheid. Elk jaar testen we uitgebreid of op dit vlak verbeteringen mogelijk zijn.

Duurzame kassen

In ons kassencomplex zijn de nieuwste, energiezuinige technieken gebruikt voor een optimale teelt. De goede faciliteiten zorgen bovendien voor een fijne werkomgeving voor ons team van betrokken medewerkers. <

- Cortaderia - SEL. PUMILA

EN | Innovations in cultivation

AllPlant believes in innovation. We constantly force ourselves to improve our methods, sustainable technologies and our range of plants.

Innovative range

We work together with breeders to introduce new plants every year. We always aspire to offer the best and most interesting plants for gardens, patios or landscape. Good quality and guaranteed delivery are important principles for us.

Cultivation in Cosmo-Plugs

Our plants are rooted in Fibre-Neth plugs that have been especially developed to meet our ideas and needs. The plugs mainly consist of coconut fibre, which is environment-friendly and gives the best growing and rooting results. The plugs retain their shape and guarantee high air content. They ensure optimal plant development and strong root development. Every year, we test whether improvements are possible in the rooting process.

Sustainable greenhouses

We use the latest energy-saving techniques to optimise cultivation in our greenhouses. Moreover, these effective facilities help to ensure a pleasant working environment for our committed team.

DU | Innovationen im Zuchtbereich

AllPlant glaubt an Innovationen. Wir zwingen uns selbst immer wieder dazu, uns bei unserer Arbeitsweise, unseren nachhaltigen Techniken und bei der Erneuerung unseres Sortiments kontinuierlich zu verbessern.

Innovatives Sortiment

In Zusammenarbeit mit Züchtern bringen wir jedes Jahr neue Pflanzen auf den Markt. Wir streben danach, immer die besten und interessantesten Pflanzen für Garten, Terrassen oder den Galabau anzubieten. Ausgangspunkte sind dabei immer eine gute Qualität und eine hohe Liefersicherheit.

Aufzucht in Cosmo-Plugs

Unsere Pflanzen werden in Fibre-Neth Plugs bewurzelt, die speziell gemäß unseren Ideen und Wünschen weiterentwickelt wurden. Diese Plugs bestehen größtenteils aus Kokos. Dadurch ist die Umweltbelastung am niedrigsten und werden die besten Wachstumsergebnisse erzielt. Die Plugs sind formfest und garantieren einen hohen Luftgehalt. Sie sorgen für eine optimale Pflanzenentwicklung und eine gute Bewurzelung. Wir testen jedes Jahr ausführlich, ob in diesem Bereich Verbesserungen möglich sind.

Nachhaltige Gewächshäuser

In unserem Gewächshauskomplex werden die neuesten, energiesparenden Techniken für eine optimale Zucht verwendet. Die guten Einrichtungen sorgen außerdem für eine gute Arbeitsumgebung für unser Team.

Onze waarden

Dit zijn de waarden op basis waarvan wij werken
en waarop onze klanten kunnen vertrouwen.

Kwaliteit

We bieden een breed en goed assortiment van hoge kwaliteit. Onze planten zijn gezond, en groeikrachtig. Ook onze dienstverlening is van hoge kwaliteit. Ons streven is de beste service te verlenen. Dat houdt in de juiste en meest interessante producten aan te bieden en mee te denken met uw wensen.

‘Ons streven
is om de beste
service te
verlenen’

Betrouwbaarheid

Afspraken nakomen, doen wat we beloven. Daar kunt u bij ons op rekenen. We bieden een hoge leveringszekerheid. U krijgt de gewenste aantallen producten van de beste kwaliteit, in de door u

gevraagde week. Daar werken we allemaal hard voor. Soms lukt het onverhoopt niet. Planten zijn tenslotte levende materialen. In zo'n geval communiceren we snel en duidelijk met u en gaan we direct in overleg. Samen proberen we tot een oplossing te komen.

Innovatie

Waar mogelijk en zinvol passen we telkens de nieuwste technieken en ontwikkelingen in de branche toe in onze teelt. Vanzelfsprekend is het voor ons ook om elk jaar weer nieuwe planten op de markt te introduceren.

Duurzaamheid

In alle aspecten van ons werk, van het produceren tot vermarkten van onze planten, staan mens en milieu centraal. Alles wat we doen, doen we met inachtneming van de omgeving waarin we leven. Duurzaamheid betekent voor ons ook een goede arbeidsomgeving. Dat zorgt er bovendien voor dat we een beter product afleveren en telkens een stapje extra kunnen zetten voor onze klanten. <

- Phlox -
FAMOUS PINK

EN | Our values

These values are an integral part of our work and clients can always count on them.

Quality

We offer a wide and effective range of high quality products. Our plants are healthy, strong and well-rooted. The services we offer are also of high quality. We aspire to offer the very best service. This means offering appropriate and interesting products and thinking about your needs and requirements.

Reliability

We abide by agreements and always do what we promise. You can count on that. We also offer a solid delivery guarantee. You will be supplied the desired number of high quality products in the week that you have indicated. We work very hard to ensure this. However, unforeseen circumstances can sometimes be encountered. After all, plants are living things. On such occasions, we will communicate with you quickly and clearly and work together on a solution.

Innovation

If possible and wherever useful, we always incorporate the latest technologies and sector developments into our processes. Naturally, we also strive to launch new plants on to the market every year.

Sustainability

We respect people and the environment in all aspects of our work; from production to plant marketing. Everything we do is done while respecting our surroundings. We believe this also means creating a pleasant working environment, which will in-turn create better products and offer extra benefits for our customers

DU | Unsere Werte

Das sind die Werte, auf deren Basis wir arbeiten und auf die sich unsere Kunden verlassen können.

Qualität

Wir bieten ein großes und gutes Sortiment von hoher Qualität. Unsere Pflanzen sind gesund und starkwüchsig. Auch unsere Service hat eine hohe Qualität. Wir streben danach, den besten Service zu liefern. Dazu gehört, dass wir die richtigen und interessantesten Produkte anbieten und mit Ihnen mitdenken.

Zuverlässigkeit

Wir erfüllen Vereinbarungen und tun, was wir versprochen haben. Darauf können Sie sich bei uns verlassen. Wir bieten eine hohe Liefersicherheit. Sie erhalten die gewünschte Menge an Produkten der besten Qualität in der von Ihnen gewünschten Woche. Dafür arbeiten wir alle hart. Manchmal gelingt etwas wider Erwarten nicht. Pflanzen sind schließlich lebende Organismen. In diesem Fall wenden wir uns sofort an Sie, erläutern die Situation und beraten uns mit Ihnen. Gemeinsam finden wir eine Lösung.

Innovationen

Wo möglich und sinnvoll verwenden wir bei unserer Arbeit jedes Mal die neuesten Techniken und Entwicklungen, die es in der Branche gibt. Außerdem ist es für uns selbstverständlich, dass wir jedes Jahr wieder neue Pflanzen auf den Markt bringen.

Nachhaltigkeit

Bei allen Aspekten unserer Arbeit, von der Produktion bis hin zur Vermarktung unserer Pflanzen, stehen Mensch und Umwelt im Mittelpunkt. Alles, was wir tun, tun wir mit Respekt vor der Umgebung, in der wir leben. Nachhaltigkeit bedeutet für uns auch, dass unsere Mitarbeiter in einem guten Arbeitsumfeld tätig sind. Das sorgt außerdem dafür, dass wir die versprochene Qualität und Service an unsere Kunden liefern können.

- Veronica -
FIRST KISS

Efficiënt AllPlant

Efficient AllPlant/Effizientes AllPlant

Rem

Teeltmanager **Rem** zorgt vanaf het moment dat de plantjes arriveren tot aan aflevering, dat alles soepel verloopt. 'Ik zorg onder andere voor de gewasbescherming, dat er voldoende watervoorraad is en dat de installaties goed werken. De routing en inrichting van deze nieuwe kas heb ik samen met Simon ontworpen. De afstanden zijn korter en er gaat minder tijd verloren aan onnodig lopen. Een goed voorbeeld is ook de eb en vloed vloer. Hierop staan planten klaar voor aflevering. De pluggen worden nat gehouden, maar de planten zelf blijven droog. Dat voorkomt schimmels en smetten in de vrachtwagen. Daardoor is minder gewasbescherming nodig. En dat is beter voor het milieu.'

EN | Head Grower **Rem** ensures that everything runs without a hitch from the point at which the plants arrive to delivery. 'I take care of such things as the crop protection and see to it that there's sufficient water supply and that the equipment is working properly. I designed the routing and layout of this new greenhouse in conjunction with Simon. The distances are shorter and less time is wasted on unnecessary walking. Another good example is the ebb and flood floor. This is where the plants are put when they're ready for delivery. The plugs are kept moist, but the plants themselves stay dry. This prevents moulds and stains in the lorry. Meaning less crop protection is needed. And that's better for the environment.'

DE | Zuchtleiter **Rem** sorgt vom Augenblick der Ankunft der Pflanzen bis zu ihrer Auslieferung dafür, dass alles reibungslos verläuft. „Ich Sorge u.a. für den Pflanzenschutz, dass der Wasservorrat ausreicht und dass die Anlagen gut funktionieren. Die Wegführung und Einrichtung dieses neuen Gewächshauses habe ich gemeinsam mit Simon entworfen. Die Entfernungen sind geringer und es geht weniger Zeit durch unnötiges Laufen verloren. Ein gutes Beispiel ist auch der Ebbe- und Flutboden. Dort stehen Pflanzen, die ausgeliefert werden können. Die Plugs werden nass gehalten, aber die Pflanzen selber bleiben trocken. Dadurch werden Schimmelbildung und Flecken in den Lieferwagen verhindert und kann der Einsatz von Pflanzenschutzmitteln reduziert werden. Und das ist besser für die Umwelt.“

Angela

Angela is verantwoordelijk voor de afdeling waar de weefselweek planten en onbeworteld stek wordt opgeplant. 'Met een pincet zetten we elk plantje in de grond, zodat de wortels kunnen groeien. In de drukste periode zijn dat er tot wel 100.000 per dag. Bij elk soort printen we de labels erbij. Daarna gaan ze naar de warme ruimte hier naast ons. Die routing is in deze nieuwe kas veel efficiënter. We hoeven maar een klein stukje te lopen met de karren. Dat is prettig voor onszelf, maar vooral beter voor de planten. Die hebben daardoor geen last meer van temperatuurverschillen.'

EN | Angela is responsible for the department where the tissue culture plants and unrooted cuttings are planted. 'We use tweezers to put each little plant in the ground, to enable the roots to grow. During the busiest period we're doing up to 100,000 a day. We also print labels for each variety. Afterwards they're taken to the warm room next to us here. The routing is far more efficient in this new greenhouse. We only have to walk a short distance with the wheelbarrows. That's nice for us, but above all better for the plants. It means they no longer have to endure differences in temperature.'

DE | Angela ist für die Abteilung verantwortlich, in der die Gewebekulturpflanzen und wurzellosen Stecklinge angepflanzt werden. „Wir setzen jede Pflanze mit einer Pinzette in den Boden, damit die Wurzeln wachsen können. In der Hochsaison können es täglich bis zu 100.000 werden. Zu jeder Art drucken wir die entsprechenden Etiketten. Anschließend stellen wir sie in die warme Abteilung nebenan. Die Wegführung ist in diesem neuen Gewächshaus viel effizienter. Wir brauchen nur ein kleines Stück mit den Containern zu laufen. Das ist angenehm für uns, vor allem aber auch besser für die Pflanzen, die dadurch keine Probleme mehr mit Temperaturunterschieden haben.“

Bas is verantwoordelijk voor de warme ruimte, de eerste fase in het groeiproces van de jonge planten. 'Hier stimuleren we de wortelgroei, zodat de planten zelf voeding en water kunnen gaan opnemen. Afhankelijk van de soort duurt dat 2 tot 3 weken. In die tijd heb ik ze onder mijn hoede. Groot voordeel van deze kas is, dat we deze afdeling in vier delen kunnen opsplitsen. We gebruiken alleen de oppervlakte die we op dat moment nodig hebben. Als we genoeg hebben aan een kleinere ruimte, hoeven we dus ook minder te verwarmen en bevochtigen. Dat is veel duurzamer.'

EN | Bas is responsible for the warm compartment, the first phase in the young plants' growth process. 'Here we encourage root growth, to enable the plants to absorb water and nutrition themselves. Depending on the variety, this takes 2-3 weeks. I'm in charge of them during that time. The major advantage of this greenhouse is that we can split this department up into four sections. We only use the surface area that we need at that juncture. If a smaller room suffices, then that means we don't need to do as much in terms of heating and humidifying. That's much more sustainable.'

DE | Bas ist verantwortlich für die warme Abteilung, die erste Phase im Wachstumsprozess der jungen Pflanzen. „Hier fördern wir das Wurzelwachstum, damit die Pflanzen eigenständig Nährstoffe und Wasser aufnehmen können. Das dauert je nach Art 2 bis 3 Wochen. In dieser Zeit kümmere ich mich um die Pflanzen. Ein großer Vorteil dieses Gewächshauses besteht darin, dass wir diese Abteilung in vier Bereiche aufteilen können. Wir nutzen nur die Fläche, die wir im jeweiligen Augenblick benötigen. Wenn wir nur einen kleineren Raum benötigen, brauchen wir folglich weniger zu heizen und zu befeuchten. Das ist viel umweltfreundlicher.“

Bas

Heleen

Na de warme ruimte komen de jonge planten in de tussenruimte waar ze verder groeien. Hier zwaait **Heleen** de scepter. 'De planten worden continue gecontroleerd op kwaliteit en gescout op ziekten en plagen. Je kunt merken dat de meeste planten het hier naar hun zin hebben. Ze lijken sneller te groeien. Wanneer de karren klaar staan voor aflevering, kan ik daar met trots naar kijken: 'Daar hebben we mooi met z'n allen voor gezorgd.'

EN | After the warm compartment, the young plants are taken to the interim compartment where they continue to grow. Here **Heleen** rules the roost. 'The plants are continuously monitored in terms of quality and examined for disease and infestations. It's obvious that the majority of the plants are happy here. They seem to be growing faster. When the wheelbarrow loads are ready for delivery, I can look at them proudly and say to myself: "We did a good job looking after them all!"

DE | Nach der warmen Abteilung kommen die jungen Pflanzen in den Zwischenraum, wo sie weiter wachsen. Hier schwingt **Heleen** das Zepter. „Die Pflanzen werden kontinuierlich auf ihre Qualität und auf Krankheiten und Befall hin untersucht. Man merkt, dass es den meisten Pflanzen hier sehr gut geht. Sie scheinen schneller zu wachsen. Wenn die Container für die Auslieferung bereitstehen, kann ich mit Stolz sagen: ‚Da haben wir alle gemeinsam gut für gesorgt.‘“

De laatste halte is de koude ruimte, waar de planten afharderen. **Chris** zorgt ervoor dat de jonge planten het hier goed hebben. 'Dankzij nieuwe technieken kan ik veel efficiënter werken. Water geven, openen en sluiten van de ramen en schermdoeken: alles regel ik via mijn smartphone. Zelfs als iemand naar binnen wil, hoef ik niet meer speciaal naar de deur te lopen. Die kan ik van afstand openen. Ook van huis uit kan ik meekijken. Als ik 's nachts wakker word, kijk ik even of de kranen zijn aangezet en de planten de juiste voeding krijgen. Alles voor een goede kwaliteit van de producten.'

EN | The last stop is the cold compartment, where the plants harden off. **Chris** sees to it that the young plants are content here. 'Thanks to new technologies, I'm able to work much more efficiently. Watering, opening and closing the windows and shade screen: I do the whole lot using my smartphone. I don't even have to walk to the door if someone wants let in. I can open it remotely. It's also possible to keep an eye on things from home. If I wake up in the night, I'll quickly check to see whether the taps are turned on and the plants are getting the right nutrition. All to ensure the quality of the products is good.'

DE | Der letzte Halt ist die kalte Abteilung, wo die Pflanzen abgehärtet werden. **Chris** sorgt dafür, dass die jungen Pflanzen es hier gut haben. „Dank neuer Techniken kann ich viel effizienter arbeiten. Das Gießen und Öffnen und Schließen der Fenster und Schutztücher kann ich über mein Smartphone regeln. Und wenn jemand herein möchte, brauche ich nicht mehr extra zur Tür zu gehen, da ich diese per Fernbedienung öffnen kann. Auch von Zuhause aus kann ich kontrollieren. Wenn ich nachts wach werde, schaue ich kurz nach, ob die Wasserhähne angestellt sind und die Pflanzen die richtigen Nährstoffe erhalten. Dadurch wird die gute Qualität der Produkte gewährleistet.“

Chris

Ricardo is teamleider van de sorteerafdeling. 'In deze nieuwe kas hebben we veel meer controle en kunnen we meer planten sorteren in dezelfde tijd. We zijn sinds kort aan het testen met een innovatieve sorteermachine, die speciaal voor ons is omgebouwd. Daarmee zijn we de eerste in Nederland. Met behulp van camera's kan de computer 27 planten tegelijkertijd beoordelen en sorteren op maat, hoogte en kleur. Deze machine is echt mijn trots. Hopelijk kunnen we er in het nieuwe seizoen volop mee draaien.'

EN | Ricardo is Team Leader in the sorting department. 'We've got much more control in this new greenhouse and we can sort more plants in the same amount of time. We recently started testing with an innovative sorting machine, which was converted specially for us. We're the first ones in the Netherlands to be doing so. Using cameras, the computer can assess 27 plants simultaneously and sort them according to size, height and colour. This machine is truly my pride and joy. Hopefully we'll be able to make the most of it during the new season.'

DE | Ricardo ist Teamleiter der Sortierabteilung. „In diesem neuen Gewächshaus haben wir viel mehr Kontrolle und können in derselben Zeit mehr Pflanzen sortieren. Wir testen seit Kurzem eine innovative Sortiermaschine, die speziell für uns umgebaut wurde. Wir sind der erste Betrieb in den Niederlanden, der diese Maschine verwendet. Mit Hilfe von Kameras kann der Computer 27 Pflanzen gleichzeitig beurteilen und nach Größe, Höhe und Farbe sortieren. Diese Maschine ist mein ganzer Stolz. Hoffentlich können wir sie in der neuen Saison vollständig einsetzen.“

Ricardo

Arie

Arie, teamleider operationele zaken, is de spin in 't web rond het orderproces en de aflevering. 'Vroeger moesten we telefonisch overleggen en de kwaliteit beoordelen voordat producten de deur uitgingen. Dankzij de korte lijnen hier, kunnen we sneller beslissen of een zending verstuurd kan worden. Bij de meeste soorten lijkt de kwaliteit beter dan voorheen. De kleuren van de Heuchera bijvoorbeeld zijn fantastisch, dankzij het UV-licht dat via het foliedak wordt verspreid. Het is ook fijn dat we alle ruimte hebben. De karren rollen soepel over de brede betonpaden en we lopen elkaar niet meer in de weg.'

EN | Arie, Team Leader Operational Matters, is the spider in the web surrounding the order process and delivery. 'We used to have to discuss things over the phone and assess the quality prior to shipping products. Streamlining things has enabled us to decide more swiftly whether or not a shipment can be dispatched. The quality of most varieties appears to be better than it was previously. The colours of the Heuchera are fantastic, for instance, thanks to the UV light diffused through the plastic roof. It's great that we've got all this space too. The wheelbarrows pass over the wide concrete paths smoothly and we no longer get in one another's way.'

DE | Arie, Teamleiter für betriebliche Abläufe, kümmert sich um den gesamten Bestellprozess und die Auslieferung. „Früher mussten wir telefonisch überlegen und die Qualität beurteilen, bevor wir Produkte abgeschickt haben. Dank der reibungslosen Kommunikation hier können wir schneller beschließen, ob eine Sendung verschickt werden kann. Bei den meisten Arten scheint die Qualität besser zu sein als früher. Die Farben der Heuchera beispielsweise sind dank des UV-Lichts, das über das Foliendach verbreitet wird, fantastisch. Es ist auch toll, dass genügend Platz zur Verfügung steht. Die Container rollen angenehm über die breiten Betonwege, und wir stehen uns nicht mehr gegenseitig im Weg.“

INDUSTRIELESTOFZUIGER.NL

Betere klimaat- controle, lagere kosten

VDH Foliekassen BV uit Hazerswoude Dorp

Tussen de vele glaskassen in Noord-Holland vormt de foliekas van Gootjes AllPlant een uitzondering. Gootjes koos hiermee voor extra teeltkwaliteit én efficiëntie. “Alleen aan stookkosten in de winter bespaar je al 30 tot 40 procent.”

De foliekas wint terrein in Nederland. Vanuit een breder perspectief bekeken is dit logisch: wereldwijd groeit meer dan 95 procent van alle 'glasteeltgewassen' onder folie. “De voordelen zijn dan ook groot. Deze kas is voorzien van een dubbele laag folie met lucht ertussen. Door de isolerende werking bespaart Gootjes AllPlant tot wel 40 procent verwarmingskosten ten opzichte van glas.”

Snellere luchtwissel

Aan het woord is Ben van der Heide, eigenaar van VDH Foliekassen BV. Zijn bedrijf geniet internationale bekendheid als specialist. Voor Gootjes AllPlant realiseerde hij een bijna 22.000 m² grote foliekas, van tekening tot oplevering. “Doordat folie veel minder weegt dan glas, zijn grotere luchtramen mogelijk. Hierdoor kan Gootjes AllPlant sneller

en nauwkeuriger het klimaat naar behoeften van de plant aanpassen.”

Basis voor succesvolle teelt

Folie laat bovendien UV door én verstrooit het binnenvallende licht. Van der Heide: “Al deze voordelen leiden tot een compactere groei en betere kleuring van het gewas. En over efficiëntie gesproken: het kasgeraamte is vrijwel gelijk aan dat van een glaskas. Dus net zo snel geplaatst met evenveel inbouw mogelijkheden voor technische hulpmiddelen zoals een scherm- en verwarmingsinstallatie. Zo kan elke teler de perfecte basis voor succes creëren.”

EN | Better climate control, lower costs

The plastic greenhouses of Gootjes AllPlant are an exception to the rule among the plethora of glass greenhouses in the province of North Holland. Gootjes chose these in order to boost quality and efficiency. “On heating costs in the winter alone they save you 30-40%.” The plastic greenhouse is gaining ground in the Netherlands. Which is logical when you consider the bigger picture: throughout the world in excess of 95% of all 'glass greenhouse crops' are cultivated under plastic. “And so the advantages are considerable. This greenhouse is fitted with a double layer of plastic with air in between. Due to the insulating effect, Gootjes AllPlant is saving up to 40% on heating costs compared to glass.”

Faster air change

Ben van der Heide, owner of VDH Foliekassen BV, has a few words to add. His company enjoys international renown as a specialist. He built a 22,000 m² plastic greenhouse for Gootjes AllPlant, from design to delivery. “The fact that plastic weighs much less than glass makes it possible to have larger vents. Thus enabling Gootjes AllPlant to adjust the climate as they see fit more swiftly and more accurately.”

Basis for successful cultivation

What's more, plastic lets UV light through and diffuses the incoming light. Van der Heide: “All these benefits result in more compact growth and better colour on the part of the plants. And talking of efficiency: the greenhouse frame is pretty much the same as that of a glass greenhouse. Meaning it can be installed just as quickly with the same range of possibilities when it comes to incorporating technical equipment such as a screen and heating unit. Thus enabling any grower to create the perfect basis for success.”

DE | Bessere Klimatkontrolle, weniger Kosten

Zwischen den vielen Glasgewächshäusern in Nordholland bildet das Foliengewächshaus von Gootjes AllPlant eine Ausnahme. Gootjes hat sich damit für zusätzliche Zuchtqualität und Effizienz entschieden. „Allein an Heizkosten im Winter spart man schon 30 bis 40 Prozent.“ Foliengewächshäuser werden in den Niederlanden immer beliebter. Diese Entwicklung ist logisch, wenn man bedenkt, dass weltweit über 95 % aller ‚Glaszuchtgewächse‘ unter Folie wachsen. „Die Vorteile sind folglich groß. Dieses Gewächshaus besitzt eine doppelte Folienschicht mit dazwischen befindlicher Luft. Durch die Isolierwirkung spart Gootjes AllPlant bis zu 40 Prozent Heizkosten gegenüber Glas.“

Schnellerer Luftaustausch

Das Wort hat Ben van der Heide, Eigentümer der VDH Foliekassen B.V. Sein Betrieb genießt internationale Bekanntheit als Spezialbetrieb. Für Gootjes AllPlant realisierte er ein fast 22.000 m² großes Foliengewächshaus von der Bauzeichnung bis zur Lieferung. „Da Folie viel weniger wiegt als Glas, sind größere Luftfenster möglich. Dadurch kann Gootjes AllPlant das Klima schneller und genauer an die Bedürfnisse der Pflanzen anpassen.“

Basis für erfolgreiche Zucht

Folie lässt außerdem UV-Licht durch und verteilt das einfallende Licht. Van der Heide: „Alle diese Vorteile führen bei den Pflanzen zu einem kompakteren Wachstum und besseren Farben. Was die Effizienz angeht, entspricht der Gewächshausrahmen nahezu vollständig dem eines Glasgewächshauses. Er ist also genauso schnell mit ebenso vielen Einbaumöglichkeiten für technische Hilfsmittel wie einer Schutz- und Heizanlage aufstellbar. So kann jeder Züchter die perfekte Basis für seinen Erfolg legen.“

Inventive Software geeft een boost aan uw groeiproces!

De tuinbouwbranche wordt geconfronteerd met IT-landschappen die in een hoog tempo veranderen. Mede dankzij de introductie van Cloud-oplossingen, Apps en online applicaties raakt men het overzicht kwijt.

Om de processen efficiënter te organiseren heeft men behoefte aan één overzichtelijke oplossing. Inventive speelt hierop in met haar Enterprise Resource Platform (ERP).

Het ERP is een plaats waar medewerkers hun werk uitvoeren, maar ook informatie met elkaar delen. Het platform combineert de harde data uit het ERP-systeem met zachte data (willekeurige vastleggingen) uit uw bedrijfsprocessen. Hierdoor ontstaat op één centrale plaats een continue groeiende informatiebron, waar u uw medewerkers en business partners toegang tot kan geven middels relatieportalen. Hierdoor kunnen bijvoorbeeld relaties rechtstreeks in uw systeem bestellingen plaatsen. Het Inventive ERP systeem integreert zo de samenwerking tussen de partners in uw keten, hetgeen direct de efficiency van uw bedrijfsvoering verhoogt. Inventive werkt continu aan waarde creatie voor uw onderneming.

De processen in de tuinbouwsector

Eén van de projecten waarbij Inventive het tuinbouwproces heeft vertaald naar de Inventive software, is de implementatie van de Young Plants Software bij Gootjes-AllPlant. Dankzij de integratie van deze functionaliteit in onze standaard software, kan Gootjes-AllPlant het slagingspercentage van het productieproces voorspellen waardoor

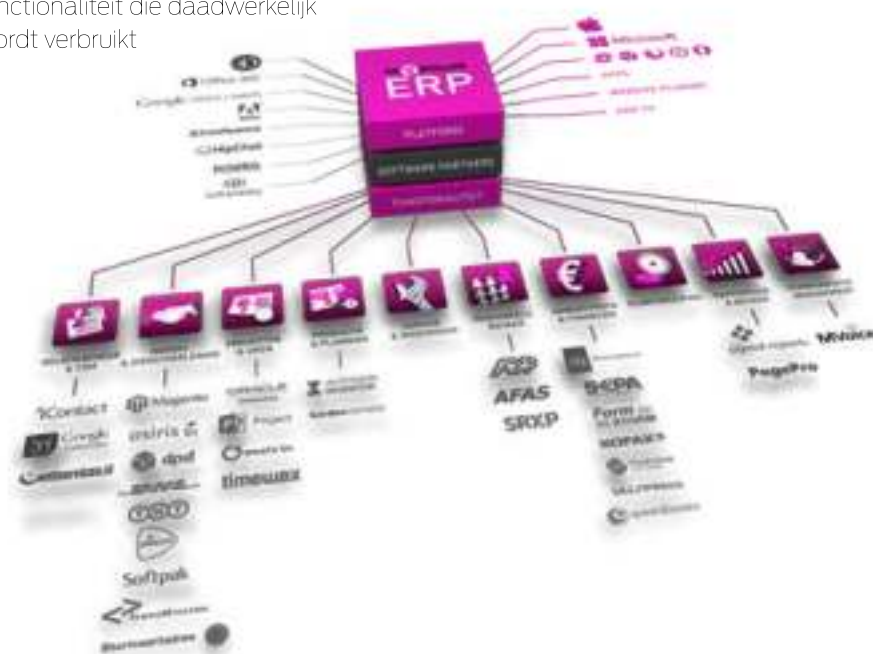

zij haar afnemers een leveringszekerheid kan bieden. Dit is één van de oplossingen die tot stand is gekomen dankzij een nauwe samenwerking tussen Gootjes-AllPlant en Inventive. Dit 'partnership' is kenmerkend voor de wijze waarop Inventive met haar relaties samenwerkt.

Hoe rekenen wij onze software af? Bij partnership hoort een passend licentiemodel. Inventive ERP Software biedt het enige eerlijke en transparante licentiemodel, Pay-Per-Use:

- U hoeft niet vooraf te bepalen wie wat gaat gebruiken
- Functionaliteit wordt afgeroepen wanneer het nodig is
- U betaalt alleen voor de functionaliteit die daadwerkelijk wordt verbruikt

Over Inventive

Inventive Software is al 30 jaar actief als producent, leverancier en implementatiepartner van de Inventive ERP Software. Inventive ondersteunt vele branches, waaronder de land- en tuinbouw, kassenbouw en andere toeleveranciers van deze sectoren. Inventive Software begrijpt door haar ervaringen de processen in deze branches en kan door middel van haar standaard software met specifieke aanpassingen, de vereiste processen verder naar uw hand zetten. Wilt u meer informatie of een kennismakingsgesprek? Neem dan contact met ons op via www.inventive.nl. <

EN | Inventive Software boosts your business value

The horticulture industry is confronted with IT-landscapes that change rapidly. Due to the introduction of Cloud based solutions, Apps and Online applications it is easy to lose track. In order to organise the processes more efficiently, there is a need for a clear and easy solution. Inventive is responding to this need with its Enterprise Resource Platform (ERP).

The ERP is the place where employees do their work and share their work with colleagues. The platform combines hard data from the ERP-system with soft data from your operating processes. As a result, you will work with a continuously growing source of information at a central point in your organisation, to which you can give your employees and business partners access through an Internet portal. According to this, your business partners will have the possibility to place information directly into your system, which will immediately increase the efficiency of your business operations. In this way, Inventive is constantly working on creating value for your company.

The processes in the horticultural sector

An example of a project in which Inventive has translated the horticultural process into the ERP software concerns the implementation of the 'Young Plants Software' at Gootjes-AllPlant. Due to the integration of this functionality into the standard software, Gootjes-AllPlant can predict the success rate of their production process. As a result, Gootjes-AllPlant can give her customers a delivery guarantee. This is just one of the solutions that is realized thanks to the close cooperation between Gootjes-AllPlant and Inventive. This 'partnership' characterizes the way Inventive cooperates with its customers.

How do we charge you for our software?

A partnership requires a proper licence model. That is why Inventive ERP software offers a fair and transparent licence model, Pay-Per-Use. With Pay-Per-Use:

- It is not necessary to determine in advance which functionality has to be used;
- All functionalities can be used, whenever you want;
- Only pay for the functionality that is actually used.

About Inventive

For the last 30 years, Inventive Software has been active as a manufacturer, supplier and implementation partner of the Inventive ERP Software. Inventive supports many industries, including agriculture and horticulture, greenhouse construction and other suppliers of these sectors. Due to our experiences, Inventive understands the processes in your industry and is able to adjust the necessary processes to your needs, using the Inventive Enterprise Resource Platform. Would you like to receive additional information or perhaps want an introductory meeting? Then please contact us through www.inventive.nl

DE | Inventive Software gibt Ihrem Wachstumsprozess neue Impulse!

Die Gartenbaubranche wird mit IT-Landschaften konfrontiert, die sich in einem hohen Tempo verändern. Nicht zuletzt durch die Einführung von Cloud-Lösungen, Apps und Online-Anwendungen verliert man schnell die Übersicht. Um die Prozesse effizienter organisieren zu können, wird eine übersichtliche Lösung benötigt. Inventive bietet diese Lösung mit der Enterprise Resource Platform (ERP).

Mit ERP können Mitarbeiter ihre Arbeit durchführen, aber auch Informationen miteinander teilen. Die Plattform kombiniert die harten Daten aus dem ERP-System mit weichen Daten (beliebigen Festlegungen) aus den Betriebsprozessen. Dadurch entsteht an einer zentralen Stelle eine kontinuierlich wachsende Informationsquelle, auf die Ihre Mitarbeiter und Geschäftspartner mit Hilfe spezieller Portale zugreifen können. Dadurch können Geschäftspartner beispielsweise direkt in Ihrem System Bestellungen aufgeben. Das ERP-System von Inventive integriert so die Zusammenarbeit zwischen den Partnern in Ihrer Kette, wodurch die Effizienz Ihrer Betriebsführung sofort verbessert wird. Inventive arbeitet kontinuierlich an der Wertschaffung für Ihr Unternehmen.

Die Prozesse im Gartenbausektor

Eines der Projekte, bei dem Inventive den Gartenbauprozess in die Inventive-Software integriert hat, ist die Implementierung der Young Plants Software bei Gootjes-AllPlant. Dank der Integration dieser Funktionalität in unsere Standard-Software kann Gootjes-AllPlant den Erfolgsprozentsatz beim Produktionsprozess vorhersagen, sodass das Unternehmen seinen Käufern feste Liefertermine garantieren kann. Das ist eine der Lösungen, die aus einer engen Zusammenarbeit zwischen Gootjes-AllPlant und Inventive entstanden ist. Diese 'Partnerschaft' ist kennzeichnend für die Art, in der Inventive mit seinen Geschäftspartnern zusammenarbeitet.

Wie rechnen wir unsere Software ab?

Zur Partnerschaft gehört ein passendes Lizenzmodell. Inventive ERP Software bietet das einzige ehrliche und transparente Lizenzmodell, nämlich Pay-Per-Use:

- Sie brauchen nicht im Voraus zu bestimmen, wer was benutzen wird.
- Die Funktionalität wird abgerufen, wenn sie benötigt wird.
- Sie bezahlen nur für die Funktionalität, die tatsächlich benutzt wird.

Über Inventive

Inventive Software ist schon seit 30 Jahren als Produzent, Lieferant und Implementierungspartner der Inventive ERP Software aktiv. Inventive unterstützt viele Branchen, darunter Feld- und Gartenbau, Gewächshausanbau und andere Zulieferer aus diesen Sektoren. Inventive Software kennt aufgrund seiner Erfahrungen die Prozesse in diesen Branchen und kann mit Hilfe seiner Standard-Software mit speziellen Anpassungen die erforderlichen Prozesse noch besser an Ihre Bedürfnisse anpassen. Wenn Sie weitere Informationen benötigen oder ein Kennenlerngespräch wünschen, können Sie gern Kontakt zu uns aufnehmen via www.inventive.nl.

Specialist in license agreements and collection and monitoring of royalties

Royalty Administration International is your intellectual property specialist in the green sector. We monitor around 3,500 license agreements, serve 300 plant breeders, handle 600 plant breeders' rights applications every year, and operate in 75 countries. Making over 5,000 inspection visits a year (to both licensees and others), we focus on preventing and challenging illegal propagation of flowers, plants, fruit and vegetables. For this, we have our own team of highly experienced and enthusiastic personnel worldwide.

We act quickly, honestly and competently, and never lose sight of plant breeders' interests. We aim for a healthy sector and fair competition!
