

LEWISIA SAFIRA

FLAMINGO
Holland Inc.

- // Vibrant flowers
- // Uniform habit
- // Drought tolerant
- // Excellent color range

**WHERE PASSION
COMES TO BLOOM**

Coral

Fuchsia

Pink

Violet

White

Yellow

Transplanting

Remove liner carefully from trays so as not to damage roots. Plant liner even with soil line. Keep soil surface of liner level with surface of finished pot.

Container Sizes and Crop Times

- Quart/4" from 72-cell liner: 1ppp. 10-12 weeks after transplant.
- Gallon/6" from 72-cell liner: 1ppp. 14-16 weeks after transplant.

Growing Media

Plant into a well-drained media with a pH: 5.0-5.6

Temperature

Night temperature 50-55°F (10-13°C).

Day temperature 60-65°F (16-18°C).

Vernalization is not required but is beneficial for better flower power.

Light

Moderate to high light levels of 2,500-4,000 foot candles.

Water and Feed

Lewisia should be grown using a well balanced fertilizer at a rate of 100-125 ppm.

The media should be allowed to dry slightly between watering and never saturated.

Growth Regulators

In most conditions, PGR application will not be necessary.

Insects and Diseases

Pythium and Rhizoctonia can occur if plants are overwatered.

Preventive measures are typically not necessary.

Flamingo Holland cannot be liable for any loss of profit, growing result, or any other commercial damages resulting from the use of this guide. This guide is for information purposes only and are not warranted for content, accuracy, or performance overall.
